Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Status of Claims

1. This action is in response to the amendment and RCE filed on 10 May 2005.
2. Claims 1, 7, and 8 have been amended.
3. Claims 1-10 have been examined.

RESPONSE TO ARGUMENTS

4. Applicant's arguments received on have been fully considered but they are not persuasive. Referring to the previous Office action, Examiner has cited relevant portions of the references as a means to illustrate the systems as taught by the prior art. As a means of providing further clarification as to what is taught by the references used in the first Office action, Examiner has expanded the teachings for comprehensibility while maintaining the same grounds of rejection of the claims, except as noted above in the section labeled "Status of Claims." This information is intended to assist in illuminating the teachings of the references while providing evidence that establishes further support for the rejections of the claims.

Applicant has presented arguments with respect to the utilization of the Applicant's own admissions, asserting that since the disclosure by the Applicant is found in the *Summary of the Invention* section, the sections quoted by the Examiner do not constitute background material that may be used as a rejection of the claims. However, the Applicant states that watermarking is a **well-known technique** for marking a digital signal, such as audio and video (see at least paragraphs 0008-0010). The clear admission by the Applicant is therefore taken as matters known in the art at the time of the invention.

Previous Claim Rejections - 35 USC § 101

5. Claims 1-9 were rejected under 35 § U.S.C. 101 because the claimed invention is directed to nonstatutory subject matter. The Examiner hereby withdraws the rejections under 35 § U.S.C. 101 for lacking a technicological element.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stefik et al. (US 2001/0008557 A1) in view of Applicant's own admissions.

Claims 1-10:

Stefik discloses the limitations of claims 1-10, with the exception of a specific reference to a mobile phone. Applicant, however, in paragraphs 0008 to 0010 discloses that watermarks are a well known technique, and then goes on to describe uses of the technique to include an audio-based signal from a mobile phone. It would have been obvious to one of ordinary skill in the art to combine Stefik with the Applicant's disclosure of watermarking and mobile phone use because Stefik discloses utilizing a watermarking technique during the distribution of digital files on a computer network.
